

We are very pleased to announce that we are the distributor for Libec in Germany and Austria.

From now on the complete product range of Libec is in Riwit's distribution.

Libec as a producer of Tripod Systems, Pedestal Systems and JIBs thus has access to our broad dealer network in Germany and Austria.

For more than twenty years Libec has offered professional camera equipment on the different markets in Asia, USA and Europe.

We are proud to support the distribution of these products in Germany and Austria.

The different series of DV-, LX, RS and RSPLUS Tripods offer suitable solutions from easy video shooting to professional broadcasting.

Pedestal Systems and Swift JIB Kits enlarge the product range to outside broadcasting and studio production.

We would appreciate a short report about the Libec products and it would be very kind if you mentioned the new distribution channel.

You can find further information on our websites (www.riwit.de).

Some pictures of the Libec products can already be seen on our websites (<http://www.riwit.de/www/libec/>) or on the producer's website (<http://www.libec-global.com/products/products.html>).
